

## **Commit Four Details**

Written by James Prestage for Jack Kelke

### **Updates:**

- Edited the script slightly to save graphs as images and serve them from a /static folder.
- Reset the database (you'll have to authorise yourself again).
  - I did this to add Stava refresh tokens meaning I can pull updated data without having to reset the database.
- Edited the /weather\_graph app route to generate a bar chart comparing weather condition to distance covered and also weather condition to total moving time.
- Added an app route (/reset\_weather\_table) to refresh weather table
- Switched to my own OpenWeatherMap API key to access historical weather data.
  - I requested a bigger range of historical data through email.
  - Currently I can only use athlete data within the last year.
